

Endless Hot Water

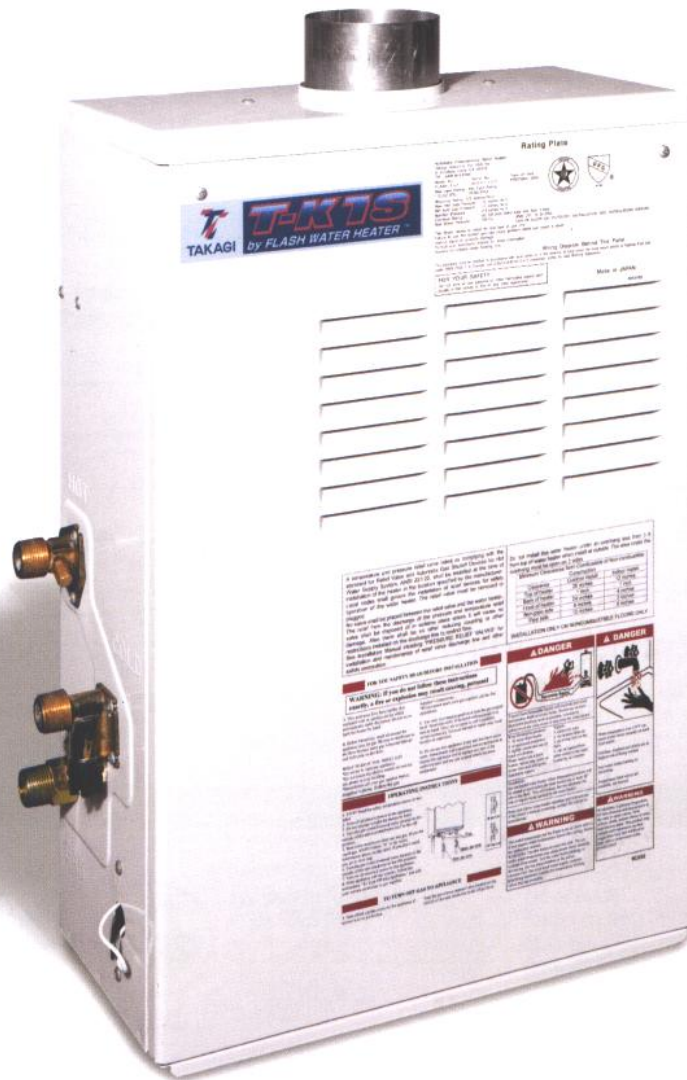

TAKAGI

Tankless Water Heater

T-K1S

For Residential or Light Commercial Use

The T-K1S is compact, energy efficient and environmentally friendly—yet it still has a large enough capacity to generate hot water as needed with a first-hour flow rate of over 240 gallons. It's the perfect choice for larger residences or light commercial applications. Wall-mounted inside or outside, the T-K1S produces endless hot water long after conventional units have run cold.

Tankless Water Heater T-K1S

Takagi has a full line of tankless water heaters.

Choosing the right unit depends on a number of factors, including the number of people using hot water, their usage habits, and if the heater will also be used for Hydronic and Radiant heating.
